

JNK1/2/3 (phospho Thr183/Y185) rabbit pAb

Cat No.:ES1350

For research use only

Overview

Product Name	JNK1/2/3 (phospho Thr183/Y185) rabbit pAb
Host species	Rabbit
Applications	IF;WB;IHC;ELISA
Species Cross-Reactivity	Human;Mouse;Rat;Chicken/pig/fish(tested by our customer)
Recommended dilutions	IF: 1:50-200 WB 1:500-2000, IHC 1:50-300 IHC 1:50-300
Immunogen	The antiserum was produced against synthesized peptide derived from human JNK1/2/3 around the phosphorylation site of Thr183 and Tyr185. AA range:151-200
Specificity	Phospho-JNK1/2/3 (T183/Y185) Polyclonal Antibody detects endogenous levels of JNK1/2/3 protein only when phosphorylated at T183/Y185.
Formulation	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Storage	Store at -20°C. Avoid repeated freeze-thaw cycles.
Protein Name	Mitogen-activated protein kinase 8/9/10
Gene Name	MAPK8/9/10
Cellular localization	Cytoplasm . Nucleus . Cell junction, synapse . In the cortical neurons, predominantly cytoplasmic and associated with the Golgi apparatus and endosomal fraction. Increased neuronal activity increases phosphorylated form at synapses (By similarity). Colocalizes with POU5F1 in the nucleus. .
Purification	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
Clonality	Polyclonal
Concentration	1 mg/ml
Observed band	46+54kD
Human Gene ID	5599/5601/5602

Human Swiss-Prot Number

P45983/P45984/P53779

Alternative Names

MAPK8; JNK1; PRKM8; SAPK1; SAPK1C;
Mitogen-activated protein kinase 8; MAP kinase 8;
MAPK 8; JNK-46; Stress-activated protein kinase 1c;
SAPK1c; Stress-activated protein kinase JNK1; c-Jun
N-terminal kinase 1; MAPK9; JNK2; PRKM9; SAPK1A;
Mi

Background

The protein encoded by this gene is a member of the MAP kinase family. MAP kinases act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. This kinase is activated by various cell stimuli, and targets specific transcription factors, and thus mediates immediate-early gene expression in response to cell stimuli. The activation of this kinase by tumor-necrosis factor alpha (TNF-alpha) is found to be required for TNF-alpha induced apoptosis. This kinase is also involved in UV radiation induced apoptosis, which is thought to be related to cytochrom c-mediated cell death pathway. Studies of the mouse counterpart of this gene suggested that this kinase play a key role in T cell proliferation, apoptosis and differentiation. Several alternatively spl
